

IFG

Lead the future

COMPANY PROFILE

2026

Introduction

International Foundation Group LLC (IFG) is a leading specialist in geotechnical and foundation engineering, having extensive experience across the **UAE since 2003.**

We deliver complex foundation and micro-tunneling projects using state-of-the-art equipment sourced from **top international manufacturers.**

Our in-house team of experienced engineers, surveyors, and project managers ensures excellence from design to execution. With a strong focus on innovation, quality, and client satisfaction, IFG has earned the trust of many of the region's top developers.

From geotechnical assessments to detailed design and construction, **IFG offers complete, reliable, and efficient solutions tailored to challenging ground conditions.**

Our Vision

Transforming underground engineering in the Middle East with cutting-edge **innovation**, unmatched technical **excellence**, and a foundation of **trust**.

Our Mission

Committed to delivering cutting-edge, high-quality construction solutions that surpass customer expectations, guided by unwavering **integrity, accountability, and teamwork**

Our Core Values

Innovation

constantly seeking new ideas and methods to improve services and operations.

Accountability

taking responsibility for our actions and decisions, and being transparent about them.

Customer Focus

putting the customer at the center of everything we do.

Integrity

being honest, ethical, and transparent in all of our actions.

Teamwork

collaboration and working together to achieve common goals.

Excellence

from alignment of our rigs to the precision of our timelines.

Milestones

2003

Successfully established operations in Dubai with a team of 50 employees, marking a significant milestone in the company's regional expansion.

2005

Diaphragm Wall construction started with the purchase of a Bauer BC 32 for work on deep basements in Downtown Dubai.

2008

Expanded into Abu Dhabi with full-scale operations.

2011

Microtunnelling work started with the purchase of 2 Nos. Herrenknecht TBM's for execution of deep sewers in Abu Dhabi.

2015

Achieved ownership of 515 units of plant and equipment, strengthening operational capacity.

2020

Successfully completed over 600 projects, demonstrating consistent performance, reliability, and industry expertise.

2025

Achieved an Official World Record for owning the largest number of Continuous Cased Flight Auger (CCFA) boring rigs and having successfully completed over 900 projects.

2026+

Initiating the strategic integration of advanced office machinery to drive operational efficiency, accelerate digital transformation, and support workforce expansion.

Sustainability & QHSE

ISO 9001:2015 Abu Dhabi/Dubai
Quality Management System

ISO 14001:2015 Abu Dhabi/Dubai
Environmental Management System

ISO 45001:2018 Abu Dhabi / Dubai
Occupational Health & Safety Management System

At International Foundation Group, QHSE is the cornerstone of our operations. Our commitment to **quality, health, safety, and the environment** is reinforced by our proud achievement of ISO certifications, reflecting the highest international standards. We execute every project with an unwavering commitment to safety, uncompromising quality, and steadfast environmental responsibility.

Official World Records

Largest Number of Continuous Cased Flight Auger (CCFA) Piling Rigs

Largest Fleet of Micro Tunnelling Boring Machines (MTBM)

Largest Number of Diaphragm Wall Cutter Machines

In-House

IFG operates the region's most advanced fleet, with all equipment maintained and mobilized **in-house** minimizing downtime and maximizing operational efficiency.

Cutter Machines (Diaphragm) 18 units	Continuous Cased Flight Auger (CCFA) 15 units	Piling Rigs 24 units			
AVN (Microtunnelling Machine) 29 units	Control Container (TBM) 13 units	Jacking Frame 18 units	Anchoring Rig 10 units		
Cranes (Crawler) 40 units	Cranes (Mobile) 20 units	Desander 22 units	HDD Machines 5 units	Vibro Hammer Drive 12 units	
Excavator 10 units	Excavator (Mini) 5 units	Concrete Pump 12 units	Mobile Concrete Mixer 16 units	Loader (Backhoe) 17 units	
Loader (Shovel) 9 units	Loader (Skid Steer) 5 units	Micro Piling Rig 2 units	Air Compressor 15 units	Forklift 4 units	Generators 13 units
Grout Pumps 12 units	Guidance System (Laser) 12 units	Hydraulic Jack & Power 8 units	Mixer (Grout Plant) 10 units	Pumps 115 units	
Mixer (Bentonite) 15 units	Power Pack + Transformer 5 units	Tower Light 20 units	Trailers 9 units	Vibrators (ABI) 4 units	
Vibro Power Pack 11 units	Welding Machine (Diesel) 25 units	Welding Machine (Electric) 35 units			

Our Projects

At the forefront of **underground engineering**, we execute high-impact projects in enabling works, shoring, piling, microtunnelling, and non-disruptive methods (NDM).

Every project reflects our commitment to innovation, technical excellence, and uncompromising safety.

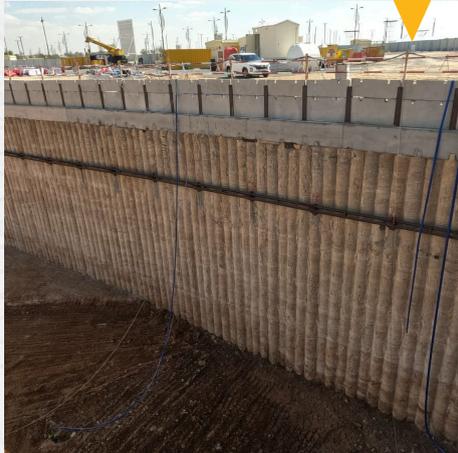

With cutting-edge technology and deep expertise, we deliver tailored solutions that overcome complex ground challenges—driving progress beneath the surface and shaping **the infrastructure of tomorrow**.

Our Core Services

Pile Foundation

Provide reliable driven and bored pile solutions to ensure deep ground stability and strong structural support for complex infrastructure and high-load projects.

Secant Piled Shoring

Trusted shoring solutions for deep excavations with precise pile installation and full safety compliance.

Diaphragm Wall Shoring

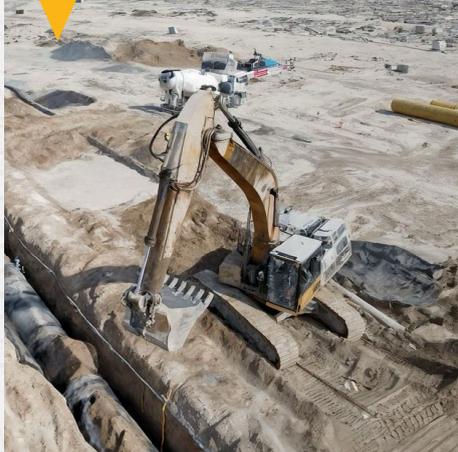

Robust and precise shoring for deep excavations, ensuring stability and minimal ground disruption in critical urban projects.

Our Core Services

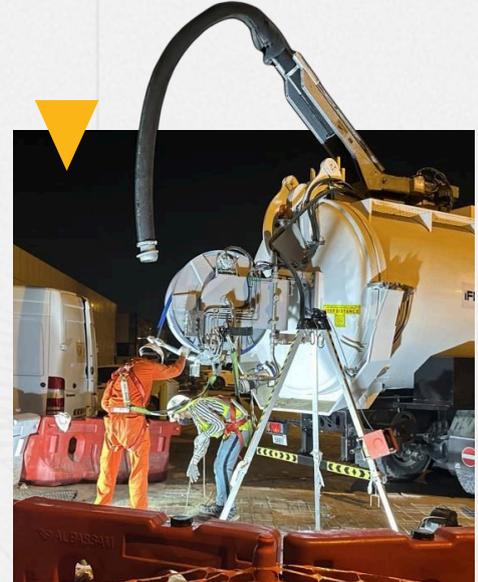

Micro-Tunneling

Expert installation of pipelines and sleeves for water, sewerage, drainage, cooling, and utility cabling—delivered with quality, safety, and reliability.

Infrastructure Works

Efficient installation and management of pipelines for water, sewerage, gas, and other essential utilities, ensuring reliable service and infrastructure integrity.

Pipeline Rehabilitation

Restoring and upgrading pipelines to extend service life, enhance performance, and prevent failures.

Extended Capabilities

- ▼ **Basement Construction & Slope Stability**
- ▼ **Retaining Wall & Systems Support**
- ▼ **Horizontal Directional Drilling**
- ▼ **Soil Improvement**
- ▼ **Pipe Jacking**

Leadership

Led by industry pioneer **Dr. Khalil Charif**, IFG is driven by a multidisciplinary leadership team of engineers, project managers, and innovation specialists with over 20 years of combined experience.

Dr. Khalil Charif
Managing Partner

“Today **IFG** is much more than a premier foundation & shaft contractor with a wide range of technologies in its toolbox, including piling systems, concrete diaphragm walls, excavation support and earth retention systems, along with the expertise and resources to develop and deliver the optimum solutions.

International Foundation Group is certainly recognized as one of Dubai’s foremost deep foundation specialists and one of the leading companies in Micro-tunnelling and is achieving success through a unique culture that values and fosters the development of its people and its reliable modern equipment.”
